

24 Port Shielded RJ45 Xover Through Coupler Panel

Description

This Tekmos Through Coupler Panel provides a means of crossing over RJ45 connections without the need for special cables or switches. The panel consists of a Black Powder Coated 1U high 19" rack mountable Zintec chassis housing 2 PCBs which provide the Xover connections.

RJ45 sockets to the front are in two banks numbered 1 through 12. Corresponding sockets to the rear are not numbered.
