

'B2' DDF Through Coupler

Description

These RJ45 Through Coupler Panels are designed to fit onto HDC43 Digital Distribution Frames (DDF) and Patch Panels. Equipped with 8 shielded Cat5e couplers they can, where required, replace the more traditional B2 Blocks and coaxial circuits.

Manufactured in 1.6mm steel, these panels are finished in a black powder coat. They also incorporate a slide label system for port identification.
